

Plate Warmer

Extra Heated Workspaces

The Plate Warmer is designed for heating all sample tubes and petri dishes, requiring a stable heated environment. Digital display with excellent temperature stability of $\pm 0.2^{\circ}\text{C}$ at 37°C . Temperature control range is 5°C above ambient to $+50^{\circ}\text{C}$. Ergonomic design, low power consumption, and fast temperature recovery for use in IVF, IUI, pharmacy, biotechnology labs, etc.

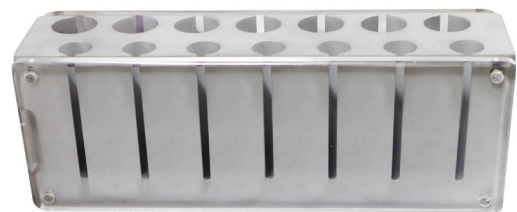

Test Tube Warmer

The Test Tube Warmer fits 14 test tubes of 14 ml and 5 ml. The Transparent Sides of the test tube warmer are removable for easy cleaning.

High in performance and durability

Scratch resistant aluminum block
